

Accumulated collection access projects often become a hindrance, diverting attention from patron-related activities. At The Tagging Team, we take charge of these projects directly on-site, ensuring minimal disruption to both your staff and patrons. This empowers you to concentrate on delivering the essential services your community requires. Through our adaptable and cooperative approach, we meticulously address all project facets, ensuring efficiency and meticulous attention to detail.

ON-SITE SERVICES

ARRIVE ON-SITE

Our professional on-site project manager will arrive at your location to begin collaborating with you and your staff to get your project started.

MAKE A PLAN

We understand that no two collections are the same as no two projects are the same, so we meticulously plan for the proper handling and processing of your unique collection of items.

HIRE THE TEAM

By hiring local qualified technicians, our on-site teams are also a part of your institution's community, working together to ensure the successful completion of your project.

EXECUTE THE PLAN

While your library continues its day-to-day work of providing services to your patrons virtually uninterrupted, our team will work to complete the project with detail and efficiency.

QUALITY CHECK

Throughout the project, all work is quality checked to ensure that no item has been left unprocessed or out of place

FINAL APPROVAL

At the project's conclusion, we don't consider the project a success until you do. Our team will be dismissed only after given your seal of approval.

LET US HANDLE THE BACKLOG OF WORK, SO YOU CAN TAKE A BREAK FROM TEDIOUS PROJECTS AND FOCUS ON YOUR PATRONS.
